Growing Notes:

2021 was the hottest year on record for Idaho and the Snake River Valley AVA. Many days the temperatures soared over 100° putting the grape plants into serious stress. This resulted in small berry sizes with intense flavor, color and structure– the making of a big and bold vintage.

However, the heat also resulted in some of the lowest yields experienced in the AVA, some Cabernet Sauvignon blocks yielding less than 1 ton per acre. The few grapes that made it into the barrel were truly incredible making the 2021 vintage very distinctive from previous years.
